

GOURAV KESARLA B

Aspiring Cloud Enthusiast | Information Science & Engineering Student

Uttarahalli, Bengaluru – 560061, Karnataka, India | +91 74838 90391 | gouravkb06@gmail.com linkedin.com/in/gouravkb06 | github.com/Magix26

OBJECTIVE

Motivated second-year Information Science & Engineering student with hands-on full-stack development experience and a strong interest in cloud computing. Applying to be part of the college's upcoming AWS/Cloud club to help build a campus community around cloud technologies, contribute to hands-on learning through workshops and hackathons, and support peers using practical, project-based experience gained from building production-style applications.

EDUCATION

JSS Academy of Technology, Bengaluru

Bengaluru, Karnataka

B.E./B.Tech in Information Science and Engineering — Expected Graduation: 2028

CGPA: 9.27 (Average of first 3 semesters)

12th Standard (State Board): 91%

10th Standard (CBSE): 81%

PROJECTS

MediTrack — Medicine Inventory & Expiry Tracking System

GitHub: github.com/Magix26/MediTrack

Full-Stack Web Application | Java 17, Spring Boot 3.2, Thymeleaf, Spring Data JPA, MySQL 8.0

A full-stack web application built for pharmacies, clinics, and home users to track medicine inventory, monitor batch-level expiry dates, and receive automatic alerts before medicines expire.

- Built a full-stack Spring Boot 3.2 application using Java 17, Thymeleaf (server-side rendering), Spring Data JPA/Hibernate, and MySQL 8.0, following the MVC architecture (controllers, services, repositories).
- Designed a fully normalized (3NF) relational database schema with 7 tables (categories, suppliers, medicines, medicine_stock, expiry_alerts, stock_transactions, medicine_audit_log), including indexes and foreign key constraints.
- Implemented 5 stored procedures (including sp_transfer_stock for atomic batch transfers and cursor-based sp_process_expired_medicines) and 3 MySQL triggers for automatic audit logging and alert generation on INSERT/UPDATE/DELETE.
- Developed a 4-tier automatic expiry classification system (EXPIRED, CRITICAL ≤ 7 days, WARNING ≤ 30 days, SAFE) using database triggers, displayed on a dashboard with visual stock and expiry statistics.
- Built complete CRUD functionality for inventory management with Jakarta Bean Validation, the Post/Redirect/Get pattern, and flash-message toast notifications; added real-time search and a printable expiry audit report.
- Automated daily expiry monitoring using Spring @Scheduled cron jobs that generate a console-logged report every morning listing all expired and near-expiry medicines.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, SQL

Web Technologies: HTML, CSS, JavaScript (Basics)

Frameworks & Tools: Spring Boot, Spring Data JPA/Hibernate, Thymeleaf, Maven, Git, GitHub

Databases: MySQL, SQLite (Stored Procedures, Triggers, Cursors, Transactions)

Other Interests: AI Enthusiast (Prompt Engineering Basics); Exploring AWS Cloud Fundamentals; Beginner in Video Editing & Marketing

LANGUAGES

Fluent in English, Kannada, Telugu, Hindi, and Tamil — able to communicate and coordinate effectively across diverse student groups.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Hackathon Volunteer & Team Lead

April 2026

JSS Navotthana — 24-Hour National Level Offline Hackathon, JSS Academy of Technology, Bengaluru

- Volunteered at JSS Navotthana, a 24-hour National Level Offline Hackathon organized by the Department of CSE (AI & ML) in collaboration with the Departments of ISE and CSE, JSSATEB, in association with IEEE IT Society, Institution's Innovation Council, GeeksforGeeks, and Hack2Skill.
- Managed and coordinated small teams across multiple hackathons as a participant, handling task delegation, timelines, and team communication under time pressure.

- Demonstrated strong leadership and event coordination skills, capable of managing small teams and events end-to-end — a key strength for founding and running a student technical club.
